

Senior Consultant - Human Factors

HFS is looking for outstanding people who want to work with human factors issues, primarily in the petroleum industry, but also related to onshore products, systems and services.

External project work will include:

Developing plans, philosophies, specifications, guidelines, leading the HF process in projects, performing studies, analyses, validation and verification, and advisory work related to:

- Human-systems-interaction
- Control room and cabin design
- Working environment
- Human error
- Workload and job organisation
- Integrated operations, remote control

Representing the company externally:

- At meetings
- At conferences
- Teaching

In house work will include:

- Developing tools, methods and criteria for evaluation and assessment of the above
- Planning integration of HF in projects
- Writing reports
- Planning studies
- Being an internal HF resource

We are looking for people who:

- Have distinguished themselves in some way
- Have a university education and several years experience in the field
- Have a technical understanding and genuine interest for HF
- Understand the engineering process, ideally in the petroleum industry
- Utilise relevant HF standards and requirements (e.g. EN 614, and ISO11064) and methods (CRIOP, CORD)
- Are solution oriented
- Are outward going and have self confidence
- Are team players, yet are self driven and can work alone
- Are preferably fluent in both Norwegian and English (oral and written)
- Enjoy the role as consultant

Location

Work place will mainly be Stavanger and Oslo. In addition, international travel is required.

We offer:

- Active participation in further development of HFS
- The opportunity to excel
- 5 weeks annual holiday
- Friendly and informal working environment
- Challenges – intellectually, professionally and personally
- Competitive remuneration package, including company pension

About HFS

Human Factors Solutions, established in 1988, is Norway's premier Human Factors consultancy. Our goal is to develop solutions, i.e. products, systems, environments and services, to meet people's aspirations, needs and limitations. Our customers include regulators, oil and gas companies, engineering contractors and systems suppliers. We are currently 10 highly committed colleagues with competencies including Human Factors/ ergonomics, chemistry, working environment, HSE, industrial- and interaction design, system development and psychology. Since HFS wishes to maintain a balance between male and female employees, we especially encourage female applicants.

How to apply

E-mail an application letter, including CV and references to adam@hfs.no and hakon@hfs.no.
