

Preface

Dick de Waard¹, Karel Brookhuis¹, and Clemens Weikert²
¹University of Groningen, The Netherlands
²Lund University, Sweden

From October 29 to 31, 2003, the Annual Meeting of the Europe Chapter was in Lund, Sweden. This book is published on the occasion of that meeting and contains contributions based on presentations that were given.

Almost all papers focus on design, which is no surprise looking at the title of the conference and book. Papers were assigned to one of eight groups, chapters if you like, some with more others with less overlap. New this year is that we have decided to make full use of the possibilities a web site offers. This means that you can listen to the sounds René van Egmond refers to in his paper, see a demonstration of Mikael Blomé's electronic guidelines, or have a look at the rearview mirror of Karel Brookhuis' AWAKE car in full colour. The web link for all these extras is <http://extras.hfes-europe.org>

We thank the host of the meeting, The Department of Design Sciences at the Ingvar Kamprad Designcentrum, Lund University, for their hospitality and support. We also thank the reviewers who helped to take care that each manuscript received the attention it deserved.

The conference was supported by the European Office of Aerospace Research and Development of the USAF, Air Force Office of Scientific Research, Air Force Research Laboratory, under Award No. FA8655-03-15041. We are very grateful for their contribution.
