Method: E_{xhaustive} B_{ridge} T_{eam} I_{nteraction} C_{oding} S_{cheme}

Results: Reliability

- Two independent observers
- Video recordings of simulator training (mean duration 43 minutes)
- N=16 training participants, 1008 variables
- 94,6% of all behaviours could be categorised
- **Krippendorff's $\alpha = 0.74$**
